The Adult Transition Program at Anthis Career Center is an optional program for young adults with special needs who are 18-21 years of age and who have completed their high school core classes. The IEP team determines the need for the transition program. Experiences and opportunities are offered to ensure that students will be able to obtain individual goals and acquire the knowledge and skills needed to access appropriate community resources and agencies. This will empower young adults to recognize their potential by providing resources, skill development, and opportunities that maximize their independence toward adult life.
